PROPOSAL FOR CORPORATE TIE – UP

ABOUT US

Dental Boutique International (DBI) was established in Bangalore to satisfy the increasing demands for expertise in the various fields of dentistry. Dental Boutique International is, fundamentally, an institution for excellence and assigns itself two complementary roles: **Quality and Service**. Quality aims at placing DBI among the top dental centers worldwide. Service provides the best possible care for patients and the community. In the modern world, with its changing life styles, food habits, working conditions, demands of the profession, needs, requirements, aspirations, the stress, all lead to ill-health if not prevented by early intervention & appropriate action. It is important to understand that good health is the best gift one can give to oneself and assure a confident bright future. When prevention is better than cure, assess your oral health quotient the way the world does.

OUR GOAL AND FUTURE PLANS :

Is to provide high quality dental care to our patients and ensure that each of them may enjoy optimal dental health throughout their life time. DBI is aiming to expand with four branches in Bangalore, other Metropolitan cities of India, Middle East and in USA. These branches will work under one software. This ensures that our patients can retrieve their case reports from any of our branches. Our endeavor is to provide the best of different specialties of dentistry under one roof with the option of access to treatment details at any of our branches abroad. With the world shrinking in size & the miles becoming shorter, this facility would be of convenience to the frequent traveler.

“The eye is blind to what mind does not know”, this adage is relevant in patient education too. We aim to educate our patients in the various facets of dental health and motivate them to seek out & obtain optimal oral health in the most cost-effective manner.

We wish to strive to make dental care a hassle free choice to individuals in job sectors, like IT & banking, with extended working hours & following various time zones. We intend to achieve this with flexible & customized appointment schedule. Scheduled working hours are from 10am – 9pm continuously and our clinic will be open on all days including SATURDAYs & SUNDAYs
